

EthicLens Fairness Scorecard

EquitaTech Systems

Model	calibrated_bias_model (golden)	Dataset	synthetic-lending
Session	SAMPLE-001	Audit date	2026-06-16
Composite	0.689 (Medium Risk)	Worst DI	0.551

Executive verdict

1 group(s) flagged. The most affected group (**race:Black**) is selected at about **55%** of the favoured group's rate — below the 80% regulatory threshold. Review the recommended mitigations before this model is cleared for production.

Per-group metrics

Group	DI	95% CI	SPD	Eq. Odds	Status
race:White	0.950	[0.89, 1.01]	-0.025	0.028	OK
race:Black	0.551	[0.50, 0.60]	-0.228	0.208	FLAG
race:Asian	0.974	[0.90, 1.06]	-0.013	0.012	OK
gender:Male	0.994	[0.94, 1.05]	-0.003	0.010	OK

What this scorecard does and does not prove. Metrics are statistical evidence, not a legal clearance. The composite is a triage convenience, not a standard; always read the per-group values and their confidence intervals. Equalized Odds requires ground-truth labels and is shown as N/A otherwise. Audit reproduced under seed 42 on dataset 'synthetic-lending'.

- Golden race:Black Disparate Impact reproduced at 0.551 (pinned band).
